## GRADIENT FLOWS EBOOKS 2019

Author: Luigi Ambrosio, Nicola Gigli u0026amp; Giuseppe Savaré

Realese Date: Lanzamiento previsto: @@expectedReleaseDate@@

This book is devoted to a theory of gradient flows in spaces which are not necessarily endowed with a natural linear or differentiable structure. It is made of two parts, the first one concerning gradient flows in metric spaces and the second one devoted to gradient flows in the  $L^1$ -Wasserstein space of probability measures on a separable Hilbert space  $X$  (we consider the  $L^1$ -Wasserstein distance,  $p_1$ , as well). The two parts have some connections, due to the fact that the Wasserstein space of probability measures provides an important model to which the "metric" theory applies, but the book is conceived in such a way that the two parts can be read independently, the first one by the reader more interested to Non-Smooth Analysis and Analysis in Metric Spaces, and the second one by the reader more oriented to the applications in Partial Differential Equations, Measure Theory and Probability.
