One who knows astrology should carefully work out his calculations according to the principles laid down by Aryabhata to arrive at the exact number of ghatikas elapsed since last sunrise at any given time, the total period of any required day should be subtracted from the maximum length of the day in the year. The figure so arrived at be multiplied by 7 and the product divided by 5. the quotient will be the length of the shadow (cast by a 12 inch stick) at mid day of the locality. Happy Reading.
