SCIENCE S WAR ON REASON EBOOKS 2019

Author: Mike Hockney

Realese Date: Lanzamiento previsto: @@expectedReleaseDate@@

People can't reason. They don't even know what reason is. "Reason" is almost always harnessed to something that has nothing to do with reason. Believers in mainstream religion are feeling types who "reason" with their emotions, or with their mystical intuitions. Scientists are sensing types. They subordinate their reason to their senses. All scientists are empiricists and are opposed to rationalism, i.e. the existence of a rational order of reality completely removed from the human senses, which can only be apprehended rationally, logically, mathematically and via intellectual intuition. u003cbr/u003e

Scientists try to don the cloak of rationalism, even though they are explicitly opposed to mathematical rationalism, which addresses a more fundamental, noumenal reality than the one amenable to phenomenal science.
