Is it obvious that a network of neurons can explain how we see There is an apocryphal story about the mathematician Hardy, who wrote an equation on the blackboard and said u0026#34;The proof of this is obviousu0026#34;. After a little while he murmured u0026#34;At least I think it isu0026#34;. and left to check the proof in the library, only returning just before the end of the lecture to announce u0026#34;Yes, it is obviousu0026#34;. Sometimes, mathematical techniques are necessary to be sure that a network with a given set of properties will generate a particular visual phenomenon. The geometrical concepts of vectors and manifolds are introduced in the context of the visual system and used to provide a framework for explaining the behaviour of the visual system.
