Author: Albert Einstein

Realese Date: Lanzamiento previsto: @@expectedReleaseDate@@

Two unabridged addresses summarizing aspects of Einstein's Special and General Theories of Relativity comprise this succinct volume. The first, *Ether and Relativity*, was delivered in 1920 and examines the properties demanded of the ether of space by the theory of relativity. *Geometry and Experience*, delivered the following year, describes the limits within which the Euclidean system can be held to be approximately true in relation to the concept of a finite universe. Written clearly and concisely, these lectures are a fascinating read for both scientist and layman. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive.
